

FEES AND BILLING POLICY

There is a basic office charge that represents a minimum fee for a minimal service visit only. Very often, the visit may include diagnostic testing such as nasal endoscopy, fine needle aspiration, tympanogram, laryngoscopy, etc. For these office procedures there is a separate charge for each, which includes a physicians charge and may include a hospital charge if it is performed at the hospital. In some cases, there may also be a pathologist and anesthesiologist charge.

The same will hold true for any surgical procedure performed in the operating room.

Although these charges can be billed to your insurance company, they are your responsibility and you will be billed for that portion not covered by your insurance.

If you have any concerns, please talk to the physician directly.

I have read the above fees and billing information and understand the policy.
